EDUCATION

Wethinkcode <i>Diploma in information Technology Systems Development</i>	Cape Town, South Africa <i>Completed – Dec 2024</i>
Unisa <i>Bachelor Of Accounting Sciences In Financial Accounting</i>	Cape Town, South Africa <i>Expected – Dec 2029</i>

CERTIFICATIONS

Comptia Data plus <i>CompTia</i>	October 2025 - October 2028 <i>RCK1NR8QVMRE161J</i>
GenAI <i>Wethinkcode GenAi Certificate</i>	June 2025 - June 2028
Google Advanced Data Analytics Certificate <i>Google Advanced Data Analytics Certificate</i>	
Google Cybersecurity Certificate <i>Google Cybersecurity Certificate</i>	

EXPERIENCE

Software development intern <i>Mandela Legacy pty ltd</i>	Present <i>Cape Town, South Africa</i>
Startup based in Cape Town in the BPO sector. Data analyst and application developer. I build and maintain data extraction pipelines for the purpose of building data story and architecture for the management of the data securely as the data is PII. My small team and I build mobile, web applications and progressive web applications for data visualisations and ad hoc. Build self hosted data warehouse and also application for clients.	
Data analyst associate <i>Capaciti</i>	Jan 2025 - OCT 2025 <i>Cape Town, South Africa</i>
I spent my time at Capaciti getting certified in Comptia data plus and coursera IBM courses for both professional development and practical cases. I extracted, transformed, and loaded HR data into company databases using Python and R Studio. Developed interactive dashboards in Power BI, Tableau, and Excel to visualise HR metrics and business performance. Cleaned and validated large datasets to ensure accuracy and consistency across platforms and structural levels. Showcased my findings and dashboards in front of peers and stakeholders helping them better understand the data story I am showcasing. Used mysql and loaded the data into one drive.	
Administrative Clerk <i>Tshaka Scholar Transportation</i>	Dec 2019 – Oct 2020 <i>Cape Town, South Africa</i>
Maintained detailed Excel-based spreadsheets to track vehicle performance, driver schedules, and route efficiency. Produced analytical reports highlighting trends Executed daily banking operations, including transaction verification and reconciliations, ensuring financial transparency and compliance.	

TECHNICAL SKILLS

Soft Skills: Communication, collaboration, leadership, problem solving, adaptability, creativity, time management, emotional intelligence.

Programming Languages: Python, Java, Ruby, JavaScript, TypeScript, PHP, Delphi Pascal, C sharp, React, C++, C, Ruby on rails, FastAPI, Django, Flask, Pydantic, PySpark, Springboot, Thymeleaf.

Data analytics: PySpark, PostgreSQL, MySQL, MongoDB, Plotly, Data Factory, Data Lake, Databricks, Redis, Pandas, NumPy, Hibernate.

Platforms: Git, GitHub/GitLab, GitHub Actions Excel, Coolify, Railway, Heroku, Netlify, Vercel, PowerBi, Tableau, IBM Cognos, AWS, Microsoft Azure, Docker, Linux.

Testing: RSpec, PyTest, integration testing, data validation tests, Capybara, FactoryBot, Junit, Mockito, Jest, Selenium, unittest, react developer tool.

DevOps/Build: Maven, Gradle, Git, Github Actions, Docker, Kubernetes, AWS, Azure.

PROJECTS

Mfanekisopilot | *typescript, LLAMA3, Supabase, Python*

- Passion project African LLM solution for the various languages that are spoken in South Africa right now my focus is on the 2 most widely spoken IsiXhosa and Isizulu. Self hosted supabase instance running on local nav storage. Using one the free and readily available ai agents LLAMA3.
- The solution is a web based application that is also a progressive web application I didnt want to deal with the creation of native application but it has properties of native applications. Staring with the codified or written language recognition with a Optical character recognition module to accurately transcribe handwritten notes into machine readable text.

Historic world pollution | *Tableau, kaggle, posit R studio, early 2000-2011*

- Sourced global air pollution dataset from kaggle, exported the data into R studio for major cleaning and formatting of the data for easy visualisation.
- Exported the dataset into csv and loaded into tableau visualised the data into a world map colour coded the countries that produced the most pollution by year measured.

uGrandjojo | *Microsoft, Open AI, Vs-code, TypeScript, CSS*

- Created a Vs-code extension in the Microsoft Ai for good 48 hour hackthon. The extension leverages chatgpt 3.5turbo to handle the sprite actions when a developer or student is being productive and uses code sense and chat function to help deal with impostor syndrome and they can choose a sprite persona help them, give feedback when the user requests.
- The extension is live in Vs-code market place the persona file checks for any harmful speech that user might be sharing with the ai agent and will connect to the Cape Mental Health for a professional and the chat will move over from ai to mental health professional. Code sense or code read is performed once the user agrees and it will assist them to the best of the agent ability. The sprite perform tricks if on idle.

Seoul Average Bike Rental | *R, Jupyter Notebook, public tableau*

- Conducted end-to-end analysis on over 200,000 bike-share trip records identify behavioral patterns between casual riders and annual members.
- Communicated the difference between member and casual subscriptions and peak periods for the casual bike renters.
